1. ABOUT US

Founded by the dynamic Mr. Anil Singh, Om Sai Enterprises has been serving the global market for 20 years. With our excellent reputation, we are proud to be the best low-cost SPM (Special Purpose Machineries) builder for detergent pharmaceuticals and chemical industries all over the world.

Om Sai Enterprises reflects quality workmanship from Gujarat in the field of machine building. With an integrated organizational approach and a growing distribution network, we have established a brand in the global arena. Om Sai Enterprises is a trusted name in the field of machinery.

Our core values lie in the true meaning of team work, dedication and delivering excellence. We strive to maintain these values throughout the entire workflow from start to finish, thus guaranteeing 100% customer delight.

2. OUR VALUES

- **Team work-** From the time a customer contacts us, the entire team works together to solve customer's problems and deliver solutions. We emphasize on team work because we believe no task is impossible when like-minded people with the same goal come together.
- **Dedication-** We strive to achieve success and meet our client's expectations with unconditional dedication and support.
- **Deliver Excellence-** Combining all our values, we boast to always deliver superior quality products; our customers have made us their priority because of our confident procedure and excellent products.

3. OUR MISSION & VISION

Our Mission

Om Sai Enterprises will be the largest group of SPM manufacturers, known to achieve the impossible and guarantee success each time, every time. We will be diverse in our range of services to help all segments across the automation industry and will have established a name for ourselves to be the best and yet economical.

Our Vision

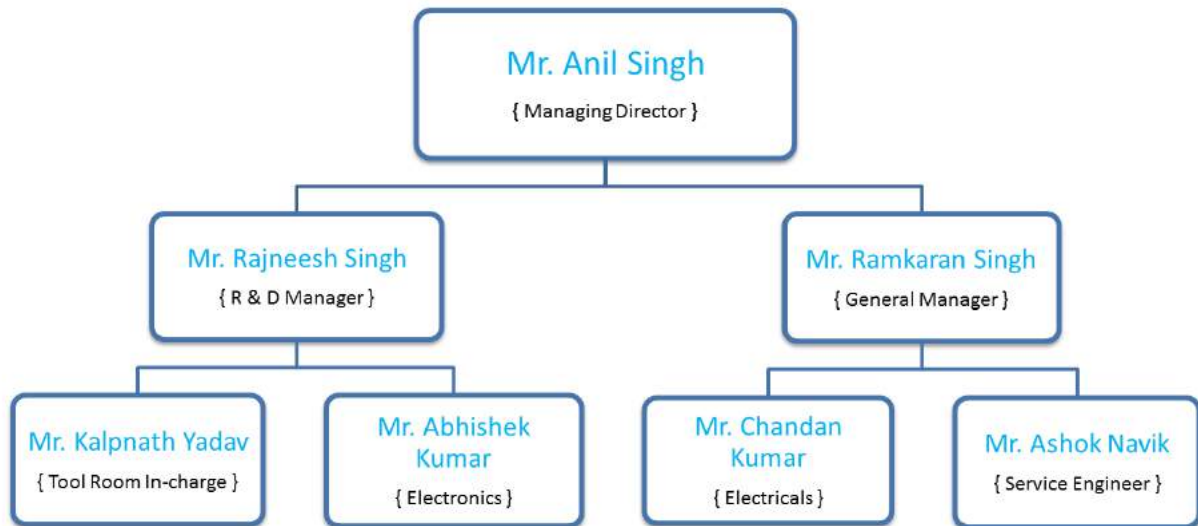

To become the biggest brand in the automation industry – the most reliable, efficient and customer friendly company in the world.

4. OPERATIONS ABROAD

OM SAI ENTERPRISES closely works for establishing customer base at Nepal, Bangladesh, Sri Lanka, Tanzania, Nigeria and UAE. We are continuously involved in providing various services in order satisfy our customer's requirements.

5. OUR TEAM

6. STRENGTH & CAPABILITIES

■ HIGH-END AND LOW-COST AUTOMATION

Our customers enjoy working with us and our products because of these two major deliverables from us. You are guaranteed high-end and low-cost automation as soon as you join hands with us.

■ IN-HOUSE DESIGN AND MANUFACTURING

The above strengths can only be possible because of our excellent and elaborate in-house processes; we believe our products are 100% compliant and aim to deliver the best.

■ INCREASE EFFICIENCY

With our machines you can be assured of the quality of production and the efficiency of the production process. With our expertise and experiences, we deliver the safest and most reliable technologies.

■ MAN-POWER EFFICIENCY

We understand the biggest challenge in manufacturing sector is handling labour and the issues related to labour. Labour strikes are the most heard of problems in all industries. Our machines help you save up on labour costs and labour usage significantly.

7. PRODUCT OFFERINGS

■ CUSTOMISED SOLUTION

- End to end services from documentation, problem solving to finished equipment
- Forte is in providing superior quality of various Product Customization Services

■ CASE PACKER

- End-of-line integration and a complete solution to tailor the needs for our customers
- We deliver system from low cost small footprint robox palletizers to multi-line, multi-SKU systems

■ AUTO STAMPER MACHINE

- Used to cut the soap bar from plodder, then break them into billets and finally stamp the required logo
- Higher functionality and durable work life

■ BELT CONVEYORS

- Two main industry classes – general material handling and bulk material handling
- Material weighed using beltweigher

■ DIVERTER CONVEYOR

- High Speed Diverter used to divert products from conveyor to other applications
- Compact & easy to use

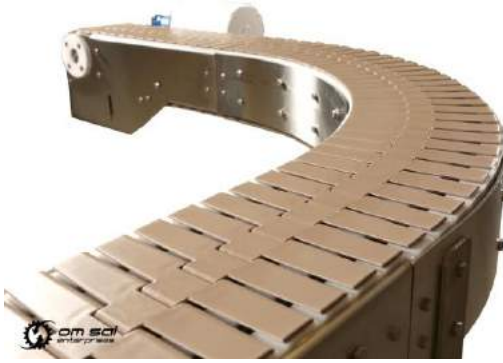

■ LOADING CONVEYOR

- Fully automatic with digital counter
- Easy to use

■ SLAT CONVEYORS

- Driven by electric motors and consists of endless chain used where rubber or canvas belt conveyors are impractical
- Versatile to handle multitude products, it has least amount of repair and maintenance accompanied by long production life

■ ROLLER CONVEYORS

- Available in chain and belt-driven models, ruggedly constructed along with various standard roller bed conveyor configuration
- Used during side loading, pushing off, accumulating or adjusting pressure
- Rollers are available in mild steel, galvanized, plastic or stainless steel

■ SPARKLITE

- Use in antiquated process of scrubbing tooling and plates, eliminates menace of conventional methods
- Heating rod is used for nozzle cleaning process

■ ROBOTICS ARM FOR PICK-N-PLACE

- One of the robotic manipulators used for replacing work force in hazardous operations like nuclear decommissioning task. It is based on Fanuc Robotic Arm with servo driven systems
- Can be customized by appropriate programming which will enable efficient work and save time and money
- Two systems included are – pack accumulation system and an automatic supermarket dolly indexing system

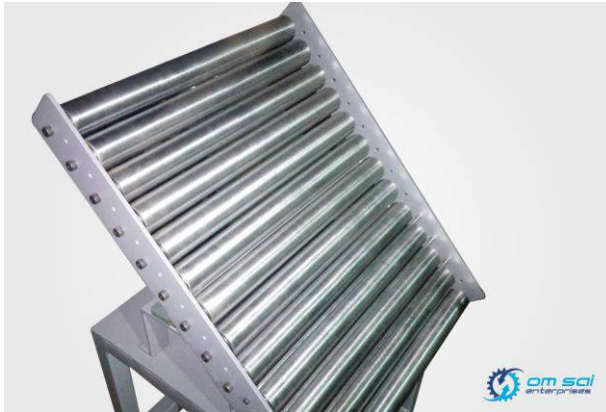

■ DOUBLE LAYER

- Reliable and durable machine used majorly in detergent pharmaceutical industries
- Highly cost effective and compact in size
- Powered by Pneumatic Actuators, helps in fatiguing repetitive human efforts that are required in packaging process

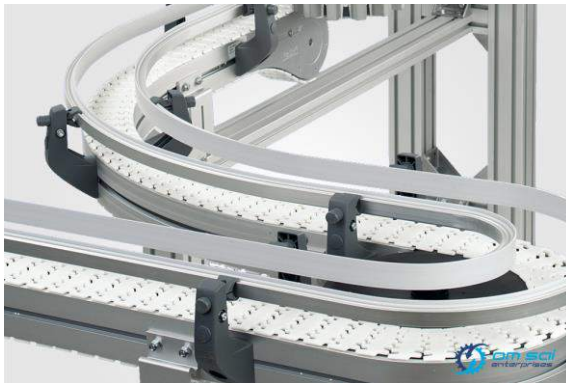

■ TIPLER

- Familiar as Tilting Assembly
- Acts as a bridge between Packer and Roller Conveyor

■ MODULAR CONVEYOR

- Specialized to design for materials handling industry, with focus on innovation of new designs and improving the existing designs
- The modular sections are made of lightweight extruded aluminum that are easy to assemble.

■ INCLINED CONVEYORS

- Used to move products automatically from one level to another solving the problem of internal logistics
- To prevent slippage and assist product the belt of the conveyor is plain flighted

■ RETRACTABLE CONVEYORS

- Retracting itself so that products can be laid gently on a flat surface is the main feature , mostly used in food and pharmaceutical industry
- Its performance is mainly decided on the speed

■ MACHINE SPARES

- High quality, manufactured with great care
- Fits effortlessly into the system during installation and ensure superior quality output

The company also proffers various other machines that are of high configuration, innovated, customized with long life. They are:

■ COLLABORATIVE ROTOBOS

■ PROCESSING MACHINE

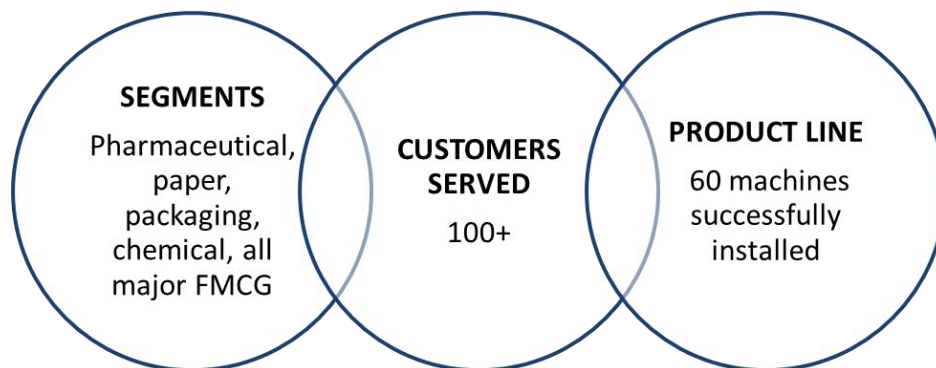

■ FLEXIBLE CONVEYORS

■ PACKAGING MACHINES
